

Integrated Report Checklist

JDP students and supervisors: Please use the form below to ensure that your planned assessment meets the APPIC criteria for an Integrated Report.

Please review the definition of an integrated report from the APPIC: The definition of an integrated psychological testing report is a report that includes a review of history, results of an interview and at least two psychological tests from one or more of the following categories: *personality measures, intellectual tests, cognitive tests, and neuropsychological tests*. This does not include reports written from an interview that is only history-taking, a clinical interview, and/or only the completion of behavioral rating forms, where no additional psychological tests are administered.

Please note the following:

- The integration of medical results and/or physiological data does not meet the APPIC definition of the “psychological test.” (For example, sleep assessments/polysonography would not count unless the assessment also included two personality/intellectual/cognitive/neuropsychological measures).
- Symptom screening instruments or behavioral rating forms do not count as a “psychological test” according to APPIC Integrated Report criteria.
- Brief cognitive/intellectual or executive functioning screening measures (e.g., SLUMS, MOCA, FrSBe, WTAR) and personality measures (e.g., NEO-FFI-3) count as psychological measures for report purposes.

Consultation: Please consult with the JDP Practicum Coordinator if you have any questions about measures that can “count” as a psychological test for the purposes of an integrated report or if you are interested in a consultation about adding measures to your current assessment battery to ensure that it meets APPIC Integrated Report criteria.

Please confirm that your assessment will include:

- Review of client history
- Results of a clinical interview

Please indicate **at least two psychological tests** that you will be completing for this Integrated Report (the 2 tests can be from the same category).
